GIGS

GEOSPATIAL INTEGRITY OF GEOSCIENCE SOFTWARE

Managed by IOGP's Geomatics Committee

An industry leading digital testing framework to evaluate application capability in establishing and maintaining geospatial integrity and data quality

Ensure your geospatial implementation is:

- **Complete**
- **Correct**
- **Consistent**
- **Verifiable**

TRUST YOUR SPATIAL DATA

GIGS has provided guidance and good practice on geospatial integrity for over a decade. GIGS 2.0 release incorporates a number of major enhancements:

> Simplified framework with targeted, flexible tests and reduced complexity

> Online testing platform closely integrated with EPSG Dataset

> Informative scoring system and easy identification of improvement actions

> Modernised test dataset including new industry data exchange formats

> Consolidated and concise guidance, with easy access to help and advice
